

Installation - Engineered . Floating . Overlay Floors

Contributed by World of Timber
Last Updated Thursday, 27 November 2008

Can be installed over any flat structural surface including concrete, tiles, cork, timber, particleboard.

- Installed on most stairs with aluminium trim angle.
- Repairs of existing floors
- Leveling work carried out.
- Installed using 'Floating' (loose laid on underlay) or 'direct stick' (adhesive glue) process.
- Perfect for apartments in order to reduce noise to suit Body Corporate/Council/neighbor guidelines.
- Unique Timber Floors with Barol.
